

ICON System™ Gas Control

Bradford White's ICON System™ is much more than a gas valve. It's a revolutionary advance in water heating control technology available only to the professional installer and wholesaler.

BRADFORD WHITE
ICON
System™

- Advanced control system for accurate water temperatures
- Exclusive Software for enhanced operational performance
- Intelligent Diagnostics to assist in troubleshooting
- Exclusive "GREEN LED" Indicator
- Pilot-On Indication
- Millivolt Powered Control requires no external electricity
- Separate Immersed Thermowell isolates temperature sensor from surrounding water
- Integrated Piezo Igniter

Committed to American Manufacturing, Wholesale Distribution, and Professional Installation.

The Bradford White ICON System™ is standard equipment on Bradford White Residential and Light Duty Commercial products* at no extra cost!

With millions of units installed since 2009, Bradford White's ICON System™ has proven its durability, reliability, and simplicity. The advanced control gives customers the enhanced performance and diagnostic capabilities that they want.

- **Advanced Temperature Control System** – Microprocessor constantly monitors and controls burner operation to maintain consistent and accurate water temperature levels.
- **Exclusive Performance Software** – Proprietary algorithms provide enhanced First Hour Ratings and tighter temperature differentials.
- **Intelligent Diagnostics** – An exclusive green LED light prompts the installer during start-up and provides ten different diagnostic codes to assist in troubleshooting.
- **Pilot-On Indication** – Flashing green LED provides positive indication that pilot is on.
- **Millivolt Powered** – An off-the-shelf thermopile converts heat energy from the pilot flame into electrical energy to operate the gas valve and electronics. No external electricity required.
- **Separate Immersed Thermowell** – High strength advanced polymer composite thermowell provides isolation between the electronic temperature sensor and surrounding water. No need to drain the tank when removing the unit or replacing the gas valve.
- **Integrated Piezo Igniter** – Built into the control itself, the igniter eliminates the need to open the combustion chamber to light the pilot.
- **Universal Replacement** – The Bradford White ICON System™ service kits are available for direct replacement, or for the replacement of Robertshaw or White-Rodgers gas valves on many older Bradford White models.

ICON System™ - Intelligent Control

Sophisticated, Beautiful & Intelligent The Perfect Choice in Gas Control Technology Only From Bradford White!

The Bradford White ICON System™ is an exclusive gas control technology that offers numerous energy and time-saving benefits including Advanced Temperature Control for consistent and accurate water temperature levels, Performance Software for enhanced First Hour Delivery ratings and tighter temperature differentials, Intelligent Diagnostics to assist in troubleshooting, and Pilot-On-Indication. The ICON System is another competitive advantage for professional installers and wholesalers. Best of all, it's provided at no extra cost.

Features

Advanced Temperature Control System

Microprocessor constantly monitors and controls burner operation to maintain consistent and accurate water temperature levels.

Exclusive Performance Software

Proprietary algorithms provide enhanced First Hour Delivery ratings and tighter temperature differentials.

Intelligent Diagnostics

An exclusive green LED light prompts the installer during start-up and provides ten different diagnostic codes to assist in troubleshooting.

Pilot-On-Indication

Flashing green LED provides positive indication that pilot is on.

Millivolt Powered

An off-the-shelf thermopile converts heat energy from the pilot flame into electrical energy to operate the gas valve and electronics. No external electricity required.

Separate Immersed Thermowell

High strength advanced polymer composite thermowell provides isolation between electronic temperature sensor and surrounding water. No need to drain the tank when removing, or replacing the gas valve.

Integrated Piezo Igniter

Built into the control itself, the igniter eliminates the need to open the combustion chamber to light the pilot.

Universal Replacement

The Bradford White ICON System™ service kits are available for direct replacement, or for the replacement of Robertshaw or White-Rodgers gas valves on most older Bradford White models.
